## SUMMARY

---

Java Developer with a year of experience in Spring Boot, specializing in Java, SQL and RESTful APIs. Passionate about solving tough problems, optimizing backend systems, and transforming bottlenecks into high-performance solutions.

## TECHNICAL SKILLS

---

**Backend:** Java, Spring Boot, Hibernate, Microservices, Maven

**Frontend:** HTML, CSS, JavaScript, jQuery, JSP

**Databases:** MySQL, SQL

**Developer Tools:** Swagger, Postman, MySQL Workbench, IntelliJ, STS, Eclipse

**Version Control:** Git, GitLab, GitHub, BitBucket

**Libraries:** Spring Data JPA, Spring Security, SLF4J

**Soft Skills:** Problem-Solving, Effective Communication, Team Collaboration, Leadership

## EXPERIENCE

---

### Java Developer

March 2023 - Feb 2024

*Daynil Group Solutions Pvt. Ltd*

- Optimized data processing by 80%, reducing the processing time for 100,000+ records from 10 minutes to 2 minutes using batch insertion techniques.
- Integrated Mailgun API in 5+ projects to automate email notifications, reducing manual effort and improving communication by 30%.
- Streamlined data transfer processes by implementing SFTP for automated Excel sheet transfers, saving 10+ hours of manual work monthly.
- Built booking-in and booking-out features for a time & attendance app, cutting time-tracking by 40% and improving accuracy.
- Developed and integrated multiple REST APIs from scratch for seamless web and mobile integration
- Improved system efficiency and user interaction by working on key modules, including Seller, Service User, and Delivery Partner.
- Added critical features like Delivery Partner management, order-related API updates, and product visibility controls, significantly improving website usability for users and sellers.

## PROJECTS

---

### MyCityA2Z | *Java, Spring boot, Hibernate, Swagger, MySQL*

- Maintained a full-stack ecommerce web application utilizing Spring Boot, Hibernate, and Swagger for robust development and testing.
- Enhanced seller features added product-hiding functionality and Delivery Partner management.
- Improved API efficiency for core modules (Admin, Seller, User), reducing data retrieval times by 10%.
- Migrated and transformed 100,000+ records across multiple tables to create a new sales register table, now actively used in production.

### Cloth Donation System Backend | *Java, Spring boot, Hibernate, Swagger*

- Built a backend for a Cloth Donation System using Spring Boot, Hibernate, and MySQL, enabling smooth user interaction and transaction management.
- Secured the system with JWT authentication and OTP validation, ensuring user data protection and safe transactions
- Integrated PayPal payments & Enabled secure processing of delivery payments.
- Streamlined API documentation utilizing Swagger to enhance collaboration and testing.

## EDUCATION

---

### Mumbai University

Mumbai

*Bachelor of Science in Information Technology*

*July. 2019 – April 2022*

### R.K Talreja College

Ulhasnagar

*Higher Secondary School in Science*

*July. 2017 – March 2019*
